USD 21M	**10 / 23**	**~340 h/yr**	**4.0 GPA**
quoted as engineering lead on 54 opportunities	decided projects won (USD 4.85M)	saved by ProjectTracker, the app I built	M.S. Manufacturing Eng. + Springer ML paper

I take industrial finishing-system projects from concept to start-up, and I build the AI software I run them on: rules-first, human-in-the-loop, measured against real decisions. English · Spanish · French.

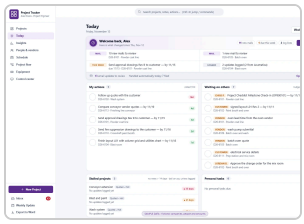

PROJECT ENGINEERING · 2025 – PRESENT

Industrial finishing systems, concept to start-up

Process selection, airflow and thermal sizing, layouts and specs for booths, ovens, AMUs and conveyors for EV and heavy-equipment plants; vendor coordination and drawing reviews.

54 opportunities · USD 21M quoted · 10/23 won · ~6 installations managed

APPLIED AI · 2026 – PRESENT · USED DAILY

ProjectTracker — command center for a project engineer

Desktop app on Outlook, ERP and SharePoint. Weighted-evidence email matching, 13 milestone detectors and a 44-criteria drawing check; an LLM only writes summaries; a human approves every ERP write.

LEAN · BRADLEY UNIVERSITY · TEAM OF 5 · 2025

Lean redesign proposal for a paint-mixing system assembly

Time study, value stream map, five wastes costed and 5 Whys; proposed an assembly cell with 5S, a kanban + poka-yoke loop and a standard procedure.

Estimated $16.5K/year savings · $12.4K investment · 9-month payback (proposal)

~95.8%
average accuracy

12 → 4×8 → 1
neural network layers

ML RESEARCH · SPRINGER · 2026

Predicting wire-EDM surface roughness while cutting

Neural network on 12 online controller features (voltage, current, feed rate), trained on an 81-cut full-factorial experiment. Co-author, Neural Computing and Applications 38, 87.

~95.8% average accuracy · 0 bad parts accepted on the test set

Daily use
restaurant app in production

+15%
warehouse efficiency

ALSO

Restaurant analytics app · operations & logistics · speaking

Windows accounting & analytics app (Electron, React, SQLite, OCR) used daily by a restaurant. Warehouse time studies and staffing models in Argentina. Graduate Commencement Speaker, Bradley University.

In daily use since Oct 2026 · +15% operational efficiency · Commencement 2025
